

The Association For Neurologically Impaired Children

Retained by parents and school districts throughout Texas for over 10 years to implement the AFNIC program for children with neurologically-based impairments

Presents:

MANAGING CHALLENGING BEHAVIORS

Teaching the Chronically Non-Compliant, Explosive, Neurologically-Impaired Child

An overview of neurological disorders

Explanation of how the behavior is a result of a neurological disability

Strategies for dealing with the non-compliant explosive child

Strategies and techniques to help build the skills the child needs to avoid behavior issues

Do you have a child that is severely non-compliant or explosive?

This session strives to provide information and strategies when dealing with children/students that have Bipolar Disorder (BP), Tourette Syndrome (TS), Asperger's Syndrome (AS), Pervasive Development Disorder, Obsessive Compulsive Disorder (OCD), Explosive Behavior, Attention Deficit Hyperactivity Disorder (ADHD), Executive Function deficits, and other neurological disorders that cause behavior issues and educational challenges.

Our Audience:

Parents, child care providers, and professional staff that work with the neurologically impaired child (teachers, special education teachers, aides, counselors, administrators, diagnosticians, and psychologists).

Date:

Time:

Where:

This Training provides a comprehensive program to drastically reduce frequency and severity of rages, answer questions pertaining to the specific needs of children in the classroom and at home, and help build skills the child needs to avoid rages and inappropriate behaviors in the future.
